

Laser is an acronym for Light Amplification by Stimulated Emission of Radiation. That's great but what does that actually mean?

Lasers are simply beams of light that have different targets. The wavelengths of the light beam can be varied to effect different targets. The most common targets are blood, water, and pigment. The skin essentially acts as a window allowing the light to pass thru to reach its intended target. Once the target is reached the light beam is absorbed by the target and is converted to heat which destroys the specific target.

The most common "target" we use the laser for in our office is to reduce unwanted hair, eradicate blood vessels on the face and certain ones on the legs, treat brown spots, erase tattoos, and tighten and tone the skin of the face.

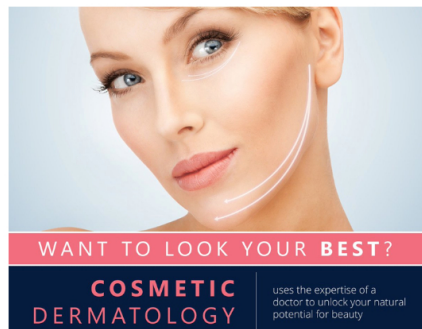

With our new Spectrum laser, we are now capable of providing safe and effective treatments to our patients with "cutting edge" technology. The treatments are comfortable, affordable, and effective - most with very little downtime!

Featured Product: Zerafite Soothing and Calming Moisturizer.

This product was specially formulated for sensitive and problematic skin. The ingredients are a unique blend of ceramides fatty acids, and cholesterol which work together to help strengthen the barrier function of the skin and help shield the skin from irritants and prevent the evaporation of moisture. Zerafite is non-comedogenic and is named after the Xerophyte species of plants (cacti) that have adapted to live in arid climates. This product is perfect to counteract the expected dryness of the winter season!

You can look like you just woke up from your younger years with an expert Botox treatment. Click here www.361derm.com to learn more about how Botox works and to talk to a doctor.

Cosmetic needs are needs too! Talk to a cosmetic dermatologist today at (215) 392-6680 to unlock your true beauty potential.

Uncover your beautiful skin by peeling away the damage with a chemical peel. Learn more about chemical peels and arrange a consult with us at www.361derm.com
